Profile

A second-year student at the University of California, Davis enrolled in the Hydrology major program, I am looking for a variety of jobs or internships to become more involved and integrated within the hydrology and engineering community. I am eager to understand the many processes involved in the resourcing and utilization of very easily, one of the most essential substances known to humans, water. During the summers, much of my time is spent in Fresno, CA, my hometown, or Davis, CA but I have the flexibility to be available in the majority of California.

Experience

Research Station Assistant, Campbell Tract UC Davis - January 2015-present

I record weather observations, precipitation measurements, calibrating, repairing, and installing various sensors. I will also be helping out with various research projects taking place at Campbell Tract or other locations on campus.

Treasurer, UC Davis Men's Club Ultimate Team — May 2014-present

As treasurer of the club, I am in charge of managing all financial information and transactions including providing reports of expenses and profits from fundraisers to the UC Davis Sports Club Management. Includes budgeting the team's food, uniforms, travel, tournaments, equipment, and facility usage costs and anything else related to the team.

Student Outreach Chair, American Water Works Association - UC Davis — May 2014-present

In charge of communication with students at meetings. Organization of class talks, chalkings, and tabling events involved with the AWWA organization. Initiate meetings with welcoming tasks. Spokesperson for undergraduate population of the UC Davis chapter.

Quality Control Manager, School Specialty, Fresno, CA – June 2013-August 2013

In charge of quality control for all outgoing small pack items. Required auditing individual boxes ensuring all content is properly accounted for. Oversaw the maintenance of the standard of products shipped out.
